

Pupil Yield Factors & Public School Clusters

2023–2024 Update

Abstract

Date	May 2024
Title	Pupil Yield Factors & Public School Clusters: 2023–2024 Update
Author	The Maryland-National Capital Park and Planning Commission
Subject	This report analyzes the pupil yield factors used in the regulatory review of preliminary subdivision plans and investigates a proposed development’s impact on Prince George’s County public schools.
Source of copies	The Maryland-National Capital Park and Planning Commission 1616 McCormick Drive Largo, MD 20774
Series number	989242702
Number of pages	54

This study updates the pupil yield factors which are used in the regulatory review of preliminary plans of subdivision. These factors are used to measure the impact that a new subdivision will have on the public schools that might serve the proposed subdivision. To determine the schools that might be impacted by a proposed subdivision, school clusters are created and updated by the County public school system. The school clusters are also part of this update.

Gavin Cohen, Secretary-Treasurer
Debra Borden, General Counsel

The Maryland-National Capital Park and Planning Commission (M-NCPPC) is a bicounty agency, created by the General Assembly of Maryland in 1927. The Commission's geographic authority extends to the great majority of Montgomery and Prince George's Counties: the Maryland-Washington Regional District (M-NCPPC planning jurisdiction) comprises 1,001 square miles, while the Metropolitan District (parks) comprises 919 square miles, in the two counties.

The Commission has three major functions:

- The preparation, adoption, and, from time to time, amendment or extension of the General Plan for the physical development of the Maryland-Washington Regional District.
- The acquisition, development, operation, and maintenance of a public park system.
- In Prince George's County only, the operation of the entire county public recreation program.

The Commission operates in each county through a Planning Board appointed by and responsible to the County government. All local plans, recommendations on zoning amendments, administration of subdivision regulations, and general administration of parks are responsibilities of the Planning Boards.

The Prince George's County Planning Department:

- The mission of the Prince George's County Planning Department is to promote economic vitality, environmental sustainability, design excellence, and quality development that promotes healthy lifestyles in Prince George's County neighborhoods.
- Our vision is to be a model planning department of responsive and respected staff who provide superior planning and technical services and work cooperatively with decision makers, citizens, and other agencies to continuously improve development quality and the environment and act as a catalyst for positive change.

PRINCE GEORGE'S COUNTY PLANNING BOARD

Dorothy F. Bailey, Vice Chair
Manuel R. Geraldo, Esq.
William Doerner
A. Shuanise Washington

MONTGOMERY COUNTY PLANNING BOARD

Artie L. Harris, Jr., Chair
Mitra Pedoeem, Vice Chair
Shawn Bartley, Esq.
James Hendrick, Ph.D.
Josh Linden

Prince George's County

Angela Alsobrooks,
County Executive

County Council

The County Council has three main responsibilities in the planning process: (1) setting policy, (2) plan approval, and (3) plan implementation. Applicable policies are incorporated into area plans, functional plans, and the general plan. The Council, after holding a hearing on the plan adopted by the Planning Board, may approve the plan as adopted, approve the plan with amendments based on the public record, or disapprove the plan and return it to the Planning Board for revision. Implementation is primarily through adoption of the annual Capital Improvement Program, the annual Budget, the water and sewer plan, and adoption of zoning map amendments.

COUNCIL MEMBERS

Jolene Ivey, Chair, 5th District

Sydney J. Harrison, Vice Chair, 9th District

Thomas E. Dernoga, 1st District

Introduction

The Pupil Yield Factors and Public School Clusters Report updates the pupil yield factors that are used in the regulatory review of preliminary subdivision plans and for analyzing a proposed development's impact on public schools.

To determine such impact, pupil yield factors are computed by spatially joining student addresses and dwelling units. Moreover, six school clusters are updated to reflect changes to the Prince George's County Public Schools' (PGCPS) boundaries.

Furthermore, the September 30th, 2023 total public school enrollment data are tabulated for the past five school years (**Table 1**). The school utilization rate by school cluster is presented in accompanying tables and maps.

This report uses school districts instead of school sites for planning purposes because school impact analyses are intended to show a proposed development's impact on its located public school districts.

PART **i**

Pupil Yield **Factors**

PHOTO: M-NCPPC

Subdivision Regulations

The term “pupil yield factor” is defined as:

“The estimated number of elementary, middle, and high school students per dwelling unit, as determined by the Planning Director, from information provided by the Superintendent of the Prince George’s County Public Schools” (Prince George’s County Subdivision Regulations, Section 24- 2300).

In Prince George’s County, the pupil yield computation is integral to the subdivision review process. Planning Department staff review the proposed preliminary subdivision plan and determine the number and type of residential units to be built. Those numbers are multiplied by the pupil yield factor to obtain the projected number of elementary, middle, and high school students generated by the proposed plan.

The Planning Department’s pupil yield factors are used for development review purposes rather than for the County’s public school enrollment projections. PGCPS updates enrollment projections yearly and includes them in the annual Educational Facilities Master Plan (EFMP), as required by the Maryland Department of Planning.

Methodology and Results

PGCPS provides the official September 30th student enrollment data (**Appendix A**) and geocoded student addresses for County elementary, middle, and high schools. Planning Department staff join the geocoded student addresses to the PropertyInfo database using ArcGIS. The PropertyInfo database is derived from Maryland State Department of Assessments and Taxation data related to property boundaries that more closely represent the County's land use and ownership information.

By spatially joining geocoded student addresses to PropertyInfo, the Planning Department staff can account for an occupied housing unit where multiple children may attend the same or different school districts. The total number of housing units is then aggregated by housing type. The housing types include single-family detached, single-family attached (including townhouses), and multifamily.

Table 2. Pupil Yield Factors, 2023

Housing Unit Type	School Level		
	Elementary	Middle	High
Single-Family Detached (SFD)	0.195	0.095	0.132
Single-Family Attached (SFA)	0.134	0.067	0.096
Multifamily (MF)	0.156	0.069	0.088

Source: Prince George's County Planning Department

Based on the geocoded student addresses from the September 30th, 2023 enrollment data, the Planning Department staff calculated the 2023 pupil yield factors as presented in **Table 2**. The pupil yield factor is derived using the following formula:

$$\left| \begin{array}{c} \text{Sum of student addresses by school type by housing type} \\ \text{divided by total housing units by housing type} \end{array} \right|$$

Table 3 illustrates a hypothetical computation of the pupil yield. This example demonstrates how to calculate the number of students generated from a new, proposed 100-dwelling-unit subdivision. The formula is expressed as:

$$\left| \text{Number of dwelling units} \times \text{pupil yield factor} = \text{pupil yields (or students) generated by the proposed preliminary subdivision} \right|$$

Table 3. Calculating Pupil Yields/Student Generation Rates

Housing Unit Type	Number of Housing Units	School Level						Total Pupil Yield
		Elementary		Middle		High		
		Factors	Pupil Yield	Factors	Pupil Yield	Factors	Pupil Yield	
Single-Family Detached (SFD)	100	0.195	19.5	0.095	9.5	0.132	13.2	42.2
Single-Family Attached (SFA)	100	0.134	13.4	0.067	6.7	0.096	9.6	29.7
Multifamily (MF)	100	0.156	15.6	0.069	6.9	0.088	8.8	31.3

PART ii

Public School Clusters

PHOTO: M-NOPPC

Legislative Background

On October 23, 2018, the Prince George's County Council adopted CR-015-2018 (DR-3), and amendments were adopted in CR-088-2021. The new Subdivision Regulations aim to streamline procedures and encourage appropriate input into the subdivision review process. The effective date of these regulations was April 1, 2022. Under the regulations, the Prince George's County Planning Director is responsible for evaluating school capacity when a preliminary subdivision plan is proposed.

Section 24-4510(b) of the adopted Subdivision Regulations (Adopted LOS Standard for Schools) retains the adequacy determination requirements that utilize the school clusters to gauge the impact of a proposed preliminary subdivision on public schools. "The number of students generated by the proposed subdivision at each stage of development will not exceed 105 percent of the state rated capacity, as adjusted by the School Regulations, of the affected elementary, middle, and high school clusters."¹ The utilization rate is the percentage of adjusted full-time enrollment (or full-time equivalent) divided by the state-rated capacity.

Methodology for Cluster Updates

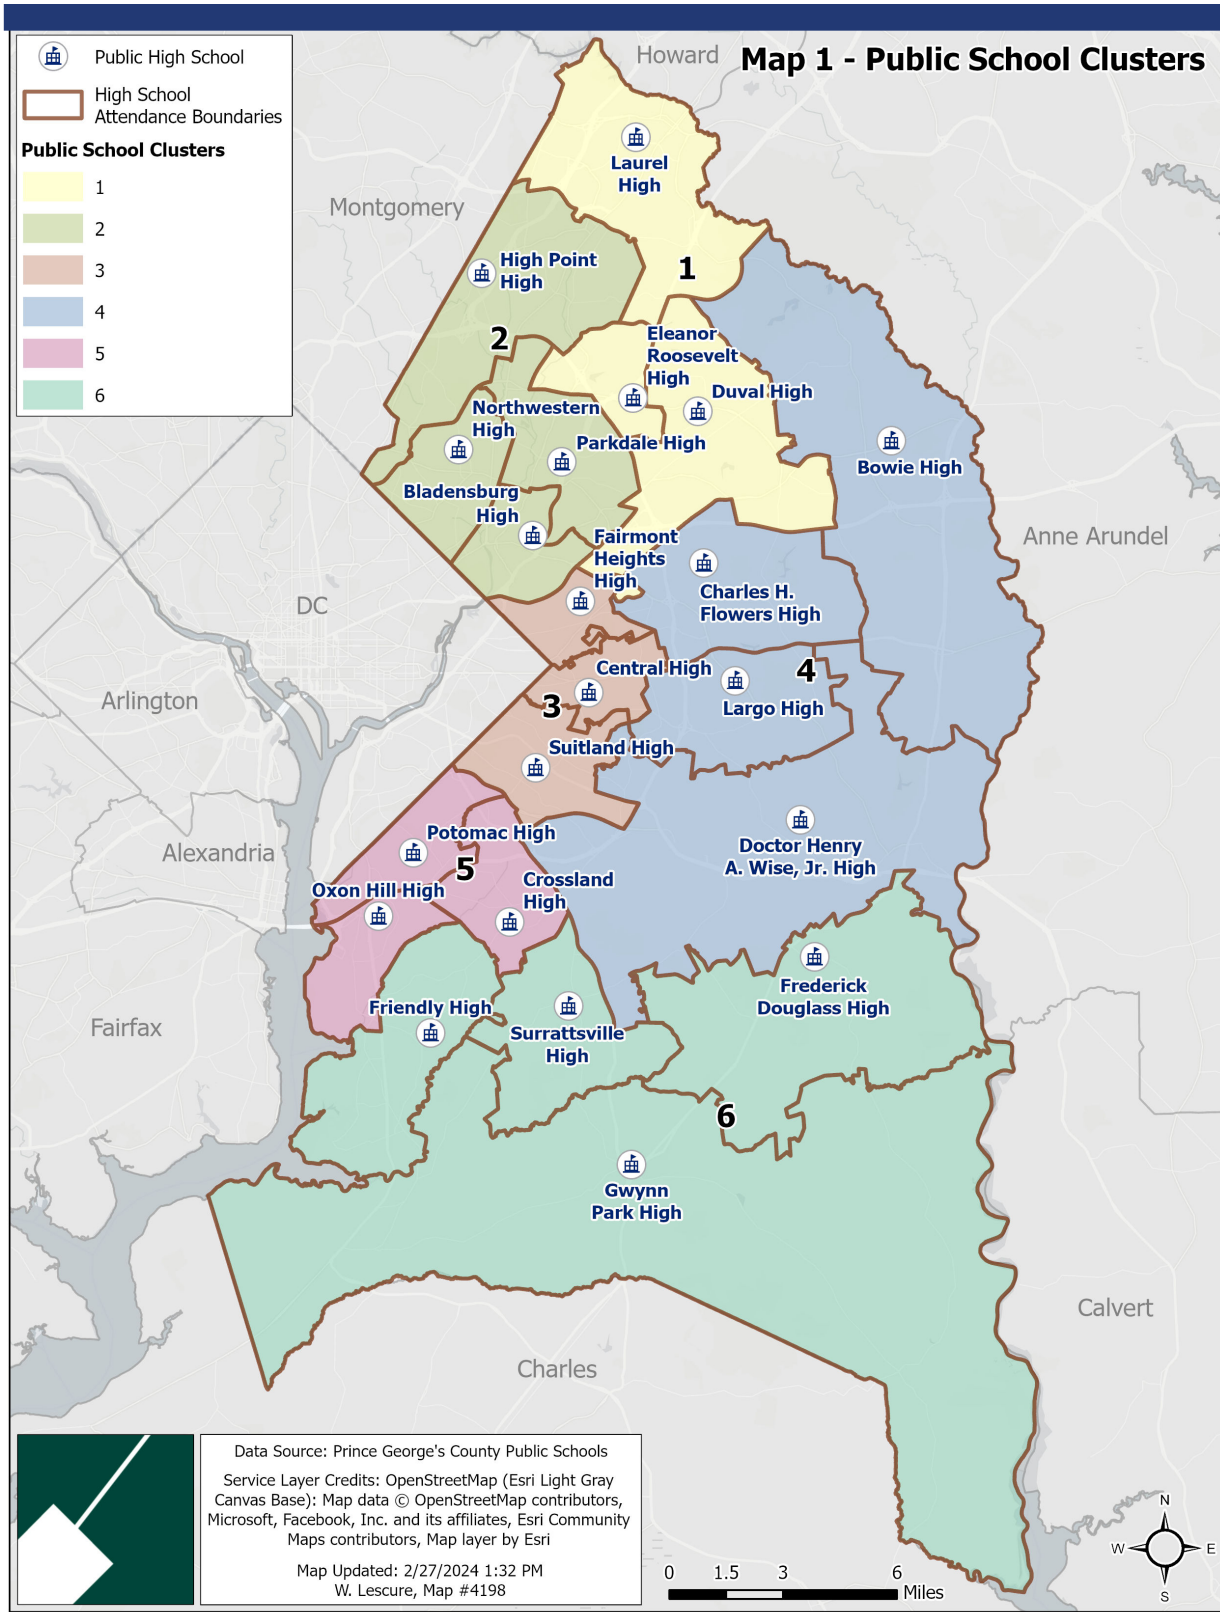

The school clusters are based on the County's public school feeder system. The feeder system is a matrix developed by PGCPSS that provides families with the flow of schools that students will attend as they move from elementary to middle school and finally to high school. The system allows groups of students to stay together throughout their years in the County's public schools.

It is worth noting that some elementary schools feed into two or more middle schools and similar situations for some middle schools that feed multiple high schools. Both situations occur in Prince George's County and other counties in Maryland, such as neighboring Howard County.

Planning Department staff use the PGCPSS SY 2023-2024 feeder patterns to update the public school clusters, which are built upon high schools and their associated feeder middle and elementary schools. **Map 1** displays all six clusters by high school district in the County.

Map 1. 2024 School Cluster Map

PART ii

Public School Clusters

Not all public schools are included in these tables. Language immersion schools, creative and performing arts schools, gifted and talented schools, or regional schools generally draw their enrollment from a wide geographic area. As a result, they do not have neighborhood attendance areas, so neither are included in the calculation of cluster area utilization nor the PGcps feeder system.

In addition, there was no state-rated capacity for the 2023-2024 school year for Adelphi Elementary School, Templeton Elementary School, and Woodmore Elementary School. The school system's Educational Facilities Master Plan(s) (EFMP)² or Capital Improvement Program and Budget³ elaborate on changes to these schools.

Adelphi Elementary School

According to the FY2023 EFMP, “the New Adelphi Area MS is being built as part of the Alternative Finance Construction (ACF) program on the former Adelphi ES site. Adelphi students have been relocated to allow for construction to begin.” The new middle school was anticipated to open in 2023. “Adelphi ES students are temporarily housed at the prior Cherokee Lane ES to allow for the construction of the new Adelphi Area MS that will be built on the elementary school site. Adelphi ES will be consolidated with the adjacent Cool Spring ES following the completion of a renovation/addition project.”

Templeton Elementary School

The 2020-2025 Approved Capital Improvement Program and Budget described, “A full renovation/replacement and addition is recommended for Templeton Elementary School driven by educational adequacy deficiencies, poor condition of the building systems and overutilization. Using the Board-adopted prototypical educational specifications, the EFMP recommends 25,000 additional SF [square feet] for a capacity of 640.”

The FY2021 EFMP indicated “Templeton ES Modernization (Capacity 609).” The FY2023 EFMP noted that this school was in Cycle 1 for modernization and replacement, which may take four to six years for planning, design, and construction. The EFMP did not state when the school would reopen for students.

Woodmore Elementary School

The FY2022 and 2023 EFMPs revealed that this school was in Cycle 3 for modernization and replacement, which may take four to six years for planning, design, and construction. In addition, Woodmore Elementary School Swing Information Session | April 25, 2023, Questions & Answers⁴ specified, “The Woodmore ES building will be demolished. The Woodmore ES school program will remain at the swing location of Meadowbrook ES until 2027” and its name will remain “during the swing.” In addition, “Woodmore ES students will be attending Meadowbrook,” and the Woodmore school “will be surplus to the county.”

PHOTO: M-NCPPC

Creative and performing arts schools draw attendance from geographic regions that extend beyond neighborhood attendance areas and are thus not included in the cluster area utilization calculations.

PART ii

Public School Clusters

PHOTO: M-NCPPC

Enrollment and Capacity

This section displays the September 30th, 2023 enrollment data, state-rated capacity, and utilization rates by school for each cluster; four types of tables are grouped together. **Tables 4, 8, 12, 16, 20, and 24** stipulate the elementary, middle, and high school feeder patterns. Following each of the preceding feeder pattern tables are three additional tables providing enrollment, capacity, and utilization data for each elementary, middle, and high school within the corresponding feeder pattern.

Academies, which include grades pre-K or K through eight, are included in the Cluster Area Schools Feeder Pattern charts but not exhibited in data tables for enrollment, state-rated capacity, and utilization rate. The enrollment, state-rated capacity, and utilization rates for those academies are shown in **Appendix C**.

PHOTO: M-NCPPC

Planning Department staff build public school clusters based on PGCPs SY2023-2024 feeder patterns, allowing elementary schools to feed into two or more middle schools and similar situations for some middle schools that feed multiple high schools. Seat Pleasant Elementary School students attend Walker Mill Middle School, which feeds three different high schools.

Academies are schools that enroll students from pre-K or K through eighth grade. Planning Department staff include academies in the Cluster Area Schools Feeder Pattern charts. Unlike typical elementary and middle schools, data tables for enrollment, state-rated capacity, and utilization rates for those academies are shown in **Appendix C**.

School Overcrowding Conditions

Maps 2, 3, and 4 demonstrate the school utilization rates by school type and individual school district. These three maps provide meaningful indicators of where overcrowding conditions exist within Prince George's County.

Because it encompasses pre-K or K through the 8th grade, an academy might be featured on elementary and middle school maps displaying utilization rates.

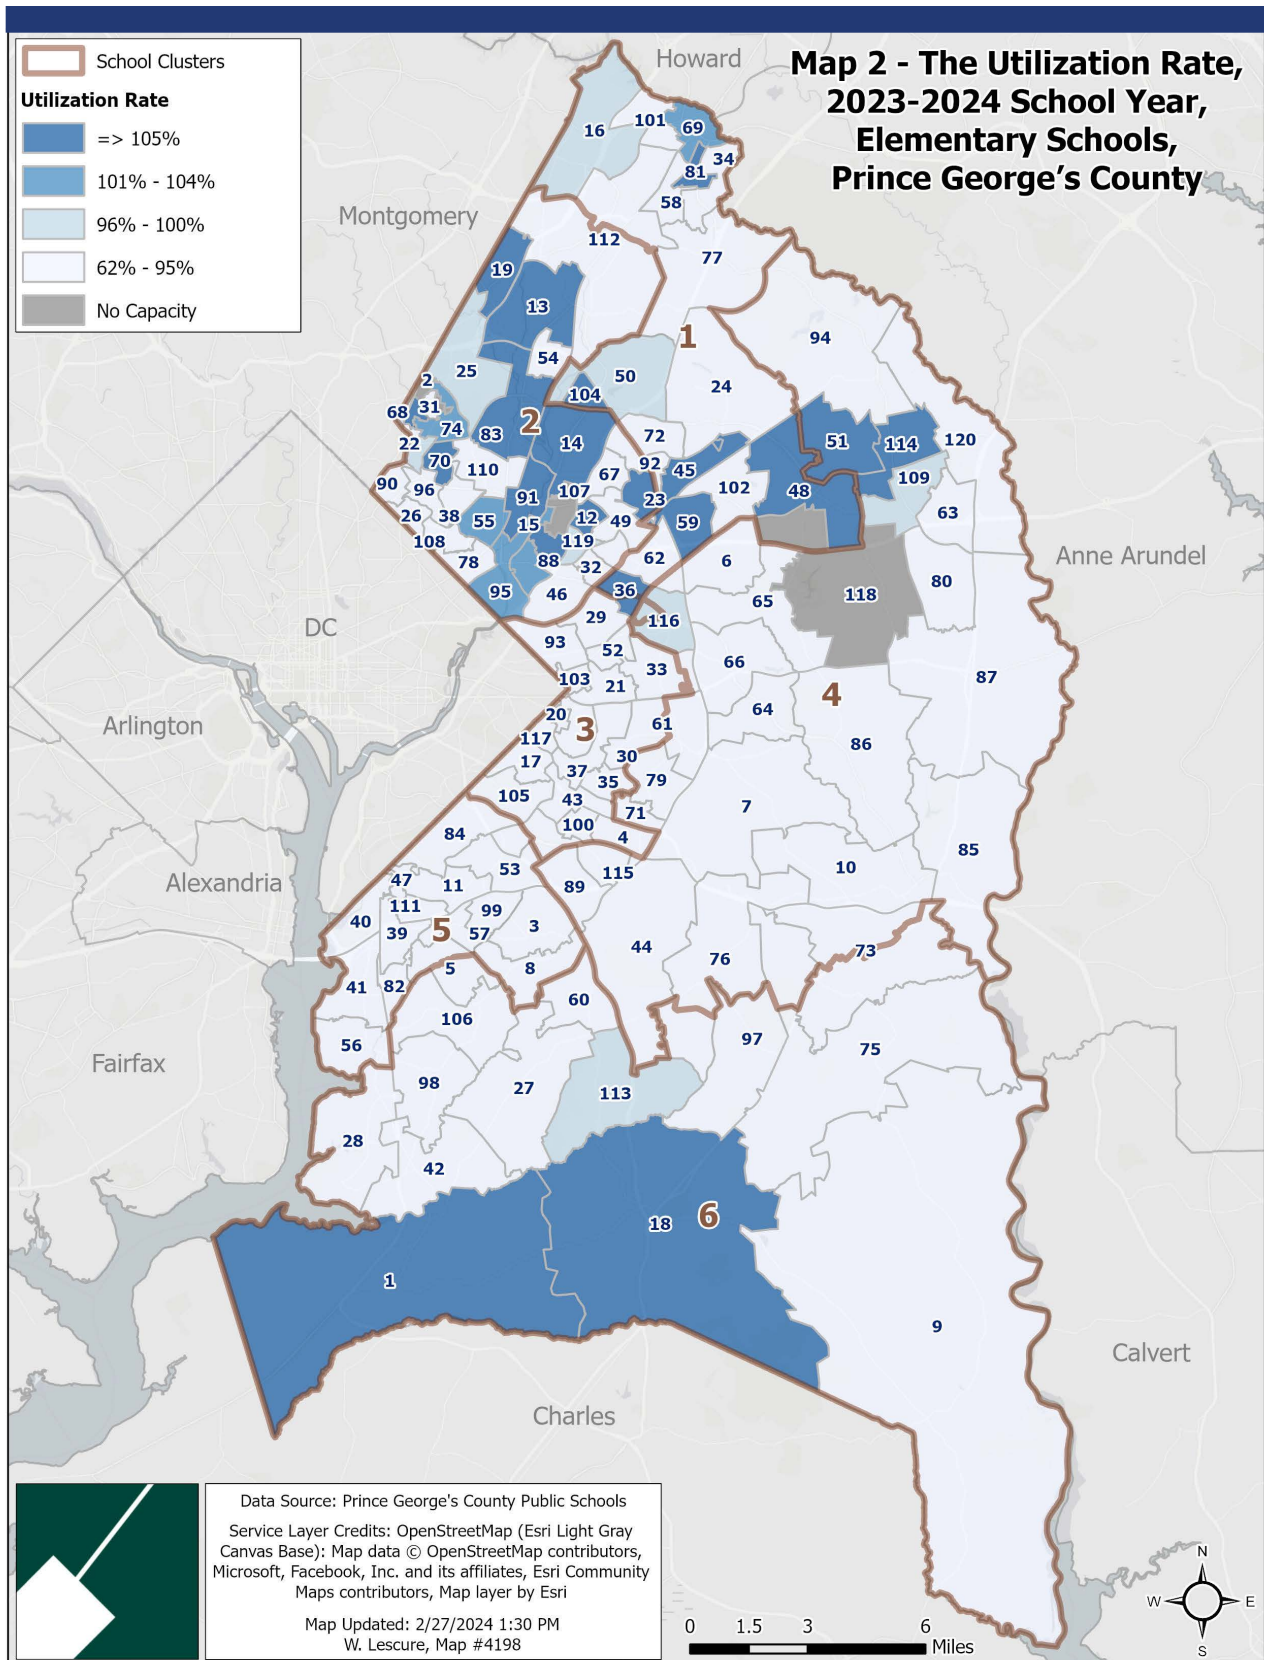

Overall, school enrollment in the northern quadrant of the County, regardless of type, is equal to or exceeds 105

percent of the state-rated capacity (or utilization rate). For elementary and middle schools, the utilization rate also appears high in the southern part of the County. The Planning Department and PGCPD collaborate on alleviating overcrowding through capital improvement programs that provide new schools or additional seats.

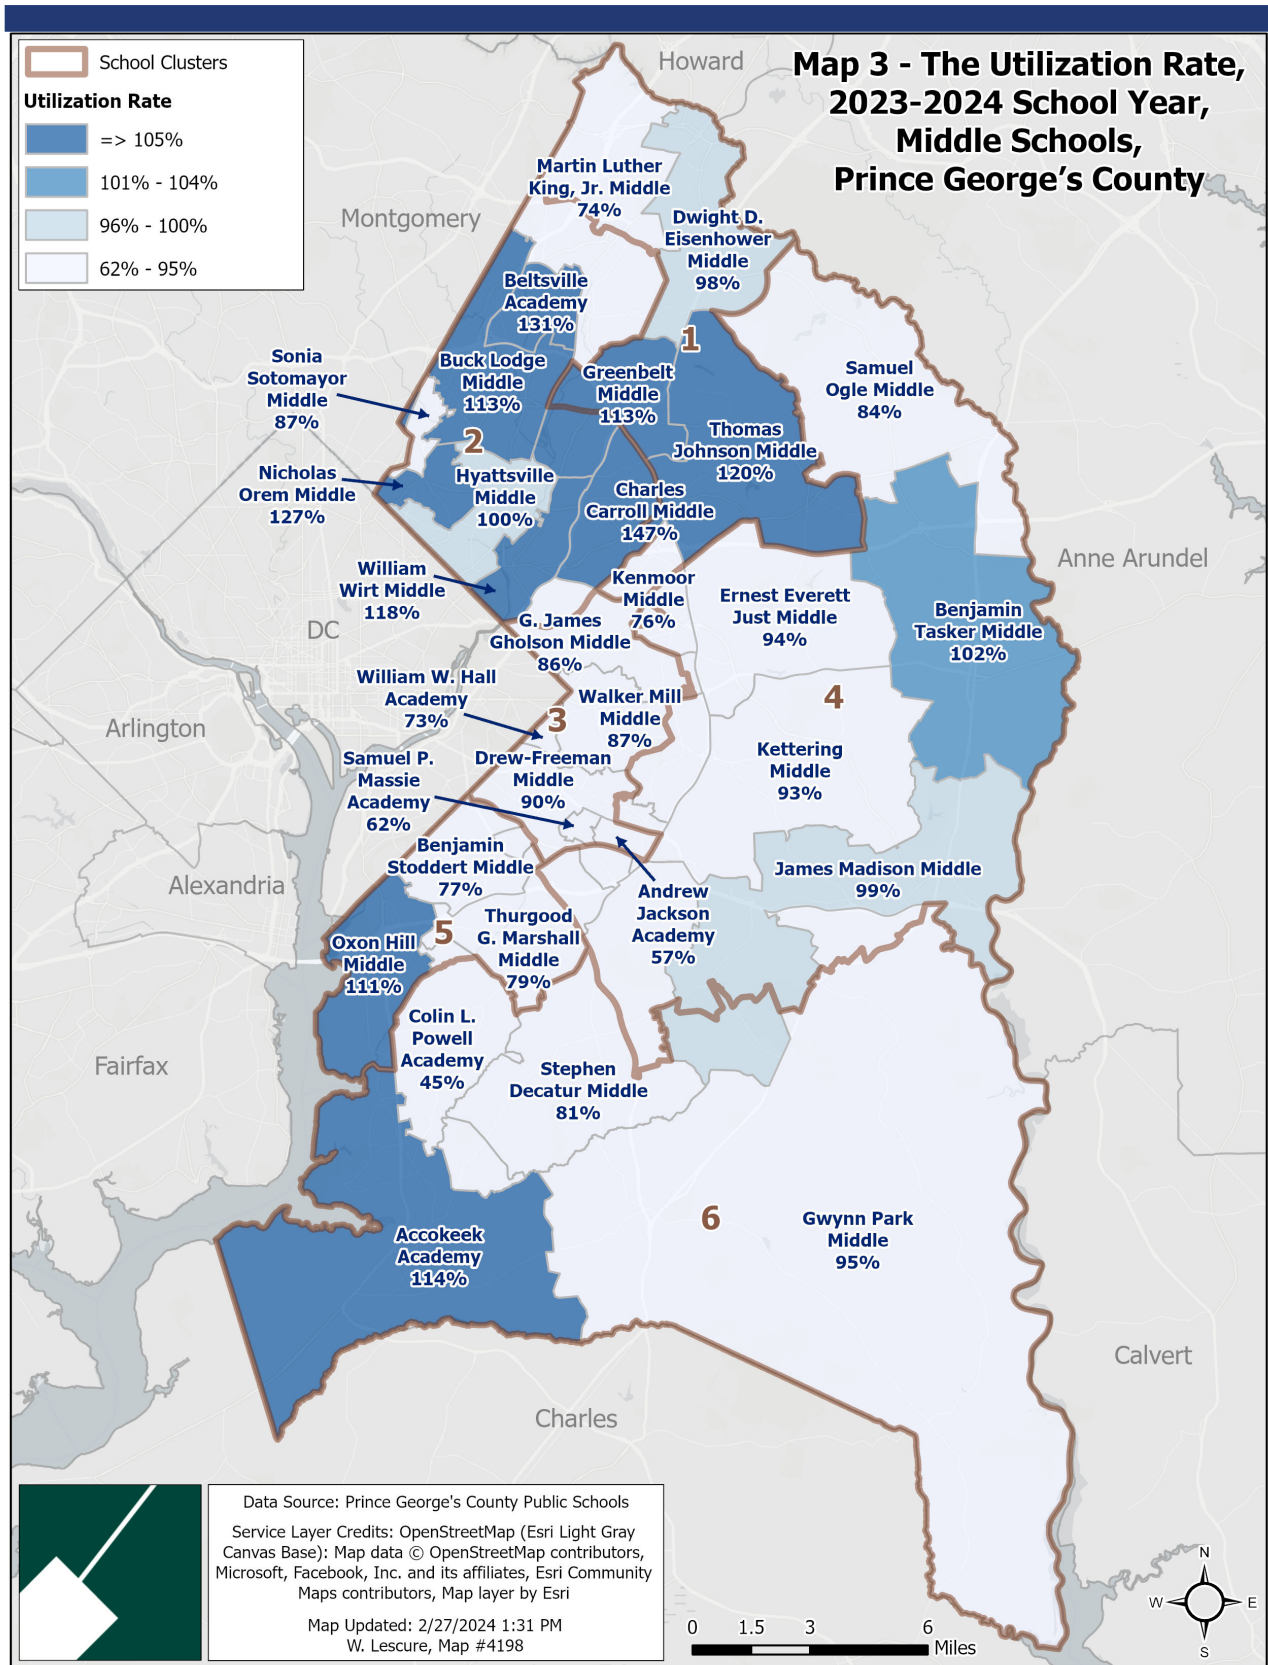

Detailed data for the elementary school map are included in **Appendix C** due to the school district's size and number of elementary schools in the County.

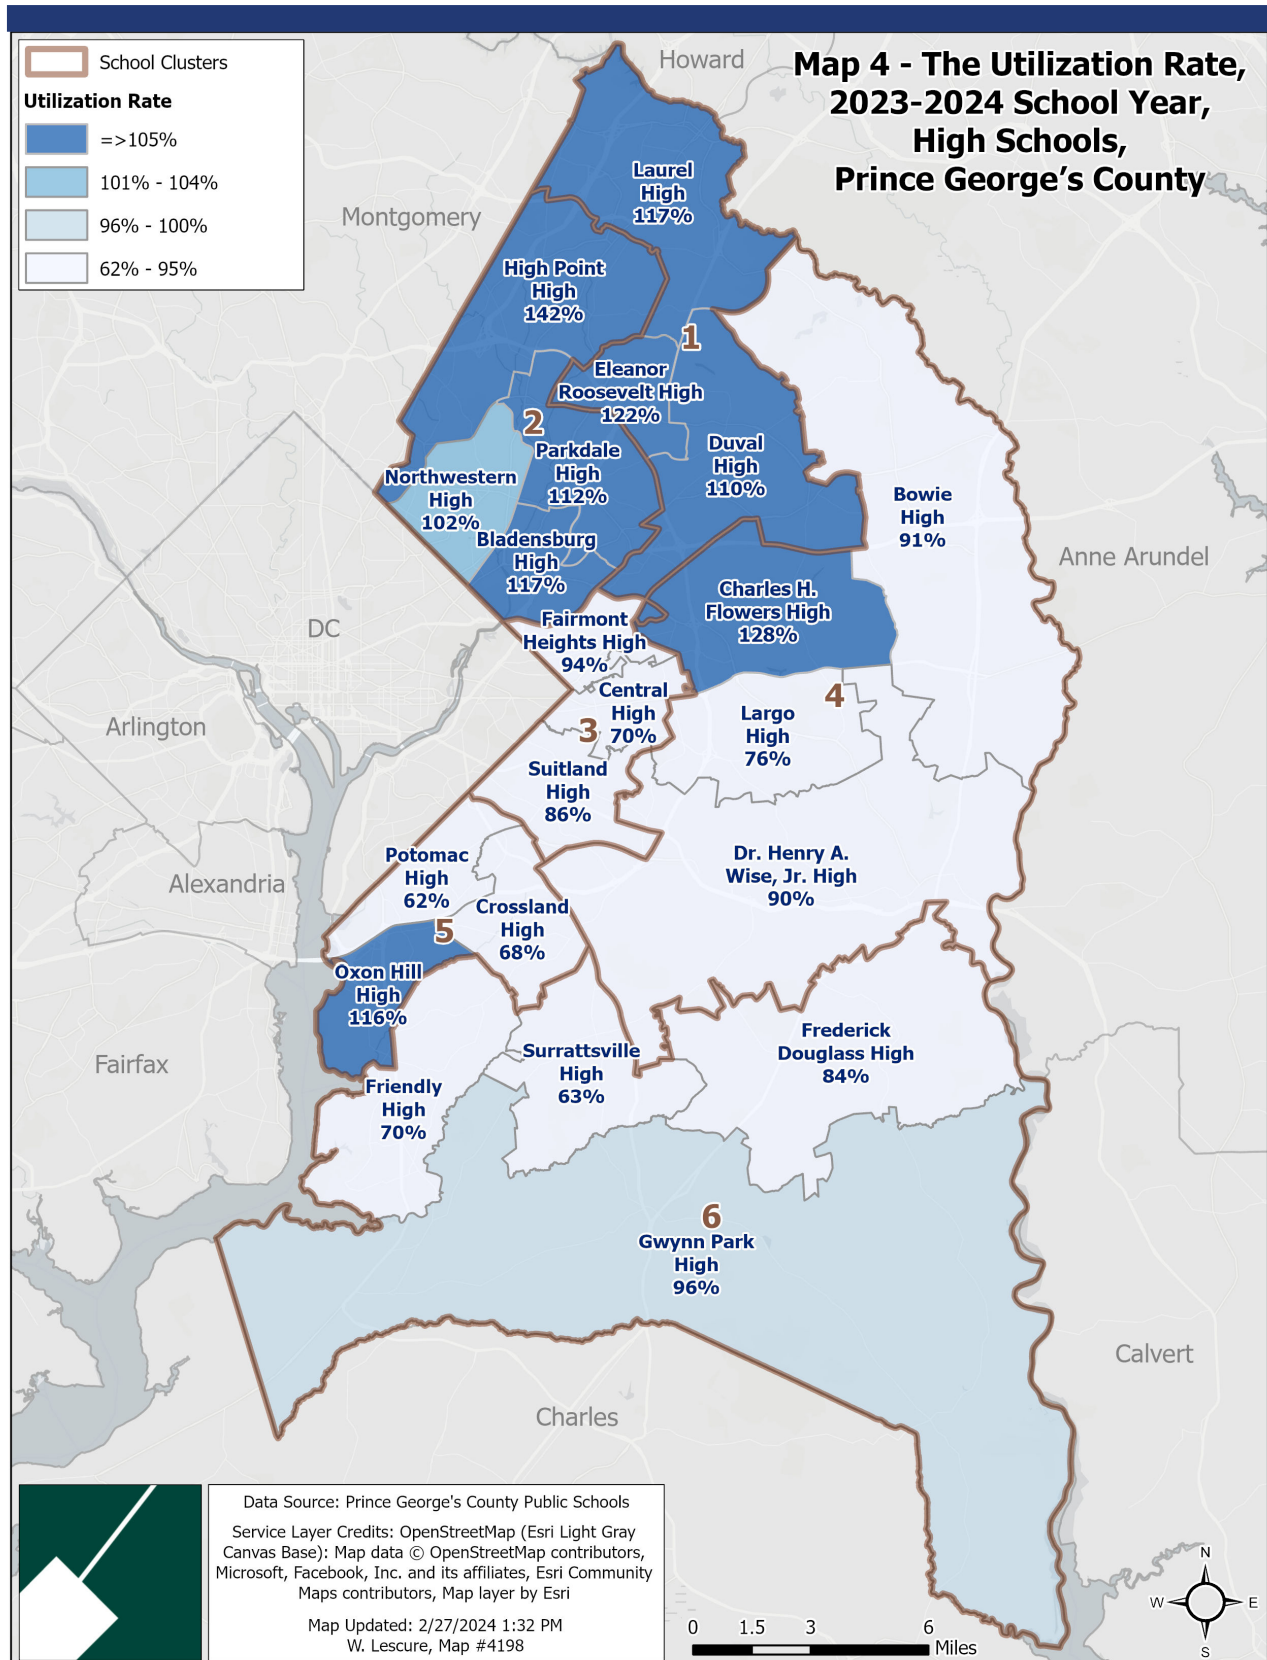

Map 2. Elementary School Utilization in Prince George's County

Map 3. Middle School Utilization in Prince George's County

Map 4. High School Utilization in Prince George's County

A graphic for the Appendix title. It features a dark blue rectangle with a yellow border. On the left side of the rectangle, there is a white triangle pointing right, containing a grayscale image of a document with blue horizontal lines. The word "Appendix" is written in white, sans-serif font in the center of the dark blue area.

Appendix

- A.** Public School Enrollment
- B.** Adopted Subdivision Regulations
- C.** Elementary School Map Index

Appendix B. Adopted Subdivision Regulations

24-4510. Schools Adequacy

(a) Applicability

- (1) Unless exempted in accordance with Section 24-4510(a)(3) below, a certificate for schools adequacy shall be reviewed and approved, approved with conditions, or denied in accordance with Section 24-4503, Certificate of Adequacy.
- (2) To gain approval of the certificate for schools adequacy, the applicant shall demonstrate the proposed development complies with the LOS standards of Section 24-4510(b) below or provides adequate mitigation (if appropriate), and complies with all other relevant requirements of this Section.
- (3) The following are exempt from the requirements of this Section:
 - (A) A preliminary plan for subdivision (minor or major) which is a redevelopment project that replaces existing dwelling units;
 - (B) A preliminary plan for subdivision (minor or major) for elderly housing operated in accordance with the State and Federal Fair Housing laws;
 - (C) A preliminary plan for subdivision (minor or major) that consists of no more than three lots on less than five gross acres of land, whose lots, except for one to be retained by grantor, are to be conveyed to a son or daughter or lineal descendant of the grantor; and
 - (D) A preliminary plan for subdivision (minor or major) located in the Transit-Oriented/Activity Center base or PD zones.

(b) Adopted LOS Standard for Schools

- (1) The adopted LOS standard for schools is based on school clusters, which are groupings of elementary, middle, and high schools that are impacted by the preliminary plan for subdivision (minor or major).
- (2) The adopted LOS standard is that the number of students generated by the proposed subdivision at each stage of development will not exceed 105 percent of the state rated capacity, as adjusted by the School Regulations, of the affected elementary, middle, and high school clusters.
- (3) The number of elementary, middle, and high school students generated by the proposed subdivision shall be determined in accordance with the pupil yield factors for each dwelling unit type as determined by the Planning Director from historical information provided by the Superintendent of the Prince George's County Public Schools.
- (4) The Planning Director shall determine:
 - (A) The school cluster or clusters impacted by the proposed preliminary plan for subdivision (minor or major).
 - (B) The actual enrollment, which is the number of elementary, middle, and high school students, as reported by the Superintendent of the Prince George's County Public Schools as of September 30 of the prior year, and as calculated by the Planning Director that is effective in January of each year for use in that calendar year.
 - (C) The completion enrollment, which is the total number of elementary, middle, and high school students to be generated by the estimated number of residential completions, for each school cluster.
 - (i) Residential completions are estimated from the total of all substantially completed dwelling units added to the County's assessable tax base in the two previous calendar years.
 - (ii) In determining completion enrollment, the estimated number of residential completions in a given school cluster will not exceed the number of dwelling units shown on:

(aa) An approved preliminary plan of subdivision (minor or major) with no waiting period, or with a waiting period less than 24 months as of September 30 of each calendar year; and

(bb) All recorded plats not subject to an adequate public facilities test for schools at time of building permit issuance.

(D) The subdivision enrollment, which is the anticipated number of elementary, middle, and high school students to be generated by all dwelling units shown on the proposed preliminary plan of subdivision (minor or major), multiplied by the pupil yield factor.

(E) The cumulative enrollment, which is the total of all subdivision enrollments resulting from approved preliminary plans of subdivision (minor or major) in each school cluster for the calendar year in which an adequate public facilities test is being applied.

(F) The Planning Director shall determine the subdivision's cluster enrollment by adding: the actual number of students in the cluster as of September 30; the number of students anticipated from residential completions in the cluster; the number anticipated from the subdivision; and the number of students anticipated from subdivisions already approved in the cluster within the calendar year. The Planning Director shall then determine the percent capacity by dividing the cluster enrollment by the state rated capacity (adjusted by the School Regulations) of schools in the cluster.

(c) **Mitigation**

When conditioned upon payment of the schools facility surcharge, or when otherwise exempt from the schools facility surcharge pursuant to Section 10-192.01, School Facilities Surcharge, of the County Code, the subdivision may be approved regardless of actual or projected school capacity.
