

DEVELOPMENT REVIEW BULLETIN

Bulletin No: 1-2025

Subject: PGAtlas Application Enhancement Announcement

Resource: Prince George's Planning – Development Review Division and Information Management Division

Date: January 13, 2025

We are pleased to announce that our mapping application PGAtlas.com now allows for the display of select permit data available from Prince George's County Department of Permitting, Inspection, and Enforcement (DPIE).

The data presented is a subset of the larger DPIE MOMENTUM permit database, representing those permit types pertaining to the planning review process of the Prince George's County Planning Department. The data collected is used to support various activities such as: tracking residential and non-residential development in the County; decision making regarding land use; and conducting forecasts related to housing and employment.

The Planning Department receives Commercial and Residential permit data on January 1st, April 1st, July 1st and September 1st of each calendar year, covering the date range of May 1, 2023, through the first day of the present quarter. DPIE permit data is subject to change and is presented as is. All official permit status and records should be obtained from the County Permitting System.
