

Pupil Yield Factors & Public School Clusters

2024-2025 Update

THE MARYLAND-NATIONAL CAPITAL PARK AND PLANNING COMMISSION
Prince George's County Planning Department

Abstract

Date	March 2025
Title	2024-2025 Update of the Pupil Yield Factors and Public School Clusters
Author	The Maryland-National Capital Park and Planning Commission
Subject	2024-2025 Update of the Pupil Yield Factors and Public School Clusters for the Prince George's County Planning Department
Source of copies	The Maryland-National Capital Park and Planning Commission 1616 McCormick Drive Largo, MD 20774
Series number	993252702
Number of pages	50

This Report updates the pupil yield factors that are used in the regulatory review of preliminary subdivision plans. These factors are applied to analyze a proposed development's impact on the public school districts where it may be located.

Debra Borden, General Counsel

The Maryland-National Capital Park and Planning Commission (M-NCPPC) is a bicounty agency, created by the General Assembly of Maryland in 1927. The Commission's geographic authority extends to the great majority of Montgomery and Prince George's Counties: the Maryland-Washington Regional District (M-NCPPC planning jurisdiction) comprises 1,001 square miles, while the Metropolitan District (parks) comprises 919 square miles, in the two counties.

The Commission has three major functions:

- The preparation, adoption, and, from time to time, amendment or extension of the General Plan for the physical development of the Maryland-Washington Regional District.
- The acquisition, development, operation, and maintenance of a public park system.
- In Prince George's County only, the operation of the entire county public recreation program.

The Commission operates in each county through a Planning Board appointed by and responsible to the County government. All local plans, recommendations on zoning amendments, administration of subdivision regulations, and general administration of parks are responsibilities of the Planning Boards.

The Prince George's County Planning Department:

- Our mission is to help preserve, protect, and manage the County's resources by providing the highest quality planning services and growth management guidance, and by facilitating effective intergovernmental and citizen involvement through education and technical assistance.
- Our vision is to be a model planning department of responsive and respected staff who provide superior planning and technical services and work cooperatively with decision makers, citizens, and other agencies to continuously improve development quality and the environment and act as a catalyst for positive change.

Acting County Executive

County Council

The County Council has three main responsibilities in the planning process: setting policy, plan approval, and plan implementation. Applicable policies are incorporated into area plans, functional plans, and the general plan. The Council, after holding a hearing on the plan adopted by the Planning Board, may approve the plan as adopted, approve the plan with amendments based on the public record, or disapprove the plan and return it to the Planning Board for revision. Implementation is primarily through adoption of the annual Capital Improvement Program, the annual Budget, the water and sewer plan, and adoption of zoning map amendments.

Introduction

The Pupil Yield Factors and Public School Clusters Report updates the 2024-2025 pupil yield factors for Prince George's County Planning Department to use for assessing the impact of new development on County public schools, as required by the County's Subdivision Regulations.

Each year, the Prince George's County Public School System (PGCPS) provides the official enrollment (the full-time equivalent) and the state-rated capacity in each County public school on September 30 of a given school year. The state-rated capacity is determined yearly by the Maryland Interagency Commission (IAC).

The school enrollment data for the past five school years are tabulated in Table 1.

The full-time equivalent enrollment, state-rated capacity, and utilization rate (the percent enrollment divided by state rated capacity) for the 2024-2025 school year are presented in accompanying tables and maps for individual elementary, middle, and high schools within their respective clusters.

Table 1. Student Enrollment, 2020 to 2024

Year	Total Enrollment
September 30, 2020	131,162
September 30, 2021	128,271
September 30, 2022	130,798
September 30, 2023	130,983
September 30, 2024	131,762

*: Adjusted for Half-Day Pre-Kindergarten. The total enrollment includes charter schools, combination schools, or centers. A combination school is for language immersion or students of color from low-income communities.

Pupil Yield Factor

"The estimated number of elementary, middle, and high school students per dwelling unit, as determined by the Planning Director, from information provided by the Superintendent of the Prince George's County Public Schools."

— Definition in Prince George's County, Subdivision Regulations, Section 24-2300

Pupil Yield

In Prince George's County, the Planning Department's pupil yield computation is a crucial step in the subdivision review process; it calculates the potential number of PGCPs pupils generated by a proposed subdivision plan. As part of reviewing a proposed subdivision plan, Planning Department staff multiply the pupil yield factor by the number of housing units by type. This calculation determines the projected number of elementary, middle, and high school students that would be generated by a proposed preliminary subdivision plan within its respective school districts.

The Planning Department's pupil yield factors are used for development review purposes rather than for the County's public school enrollment projections. PGCPs updates enrollment projections yearly and includes them in its Annual Educational Facilities Master Plan, as required by the Maryland Department of Planning.

Methodology for Pupil Yield Calculation

Every year, PGCPs geocodes student addresses for elementary, middle, and high schools. The Planning Department derives the pupil yield factors by joining geocoded student addresses and existing dwelling units by housing type with the Department's PropertyInfo database in ArcGIS. PropertyInfo is based on the Maryland State Department of

Table 2. Prince George's County 2024 Pupil Yield Factors

Type of unit	Schools		
	Elementary	Middle	High
Single-Family Detached (SFD)	0.196	0.095	0.132
Single-Family Attached (SFA)	0.134	0.064	0.095
Multifamily (MF)	0.156	0.069	0.090

SOURCE: Prince George's County Planning Department

Assessments and Taxation (SDAT) data that contains property boundaries, and uses, and ownership information.

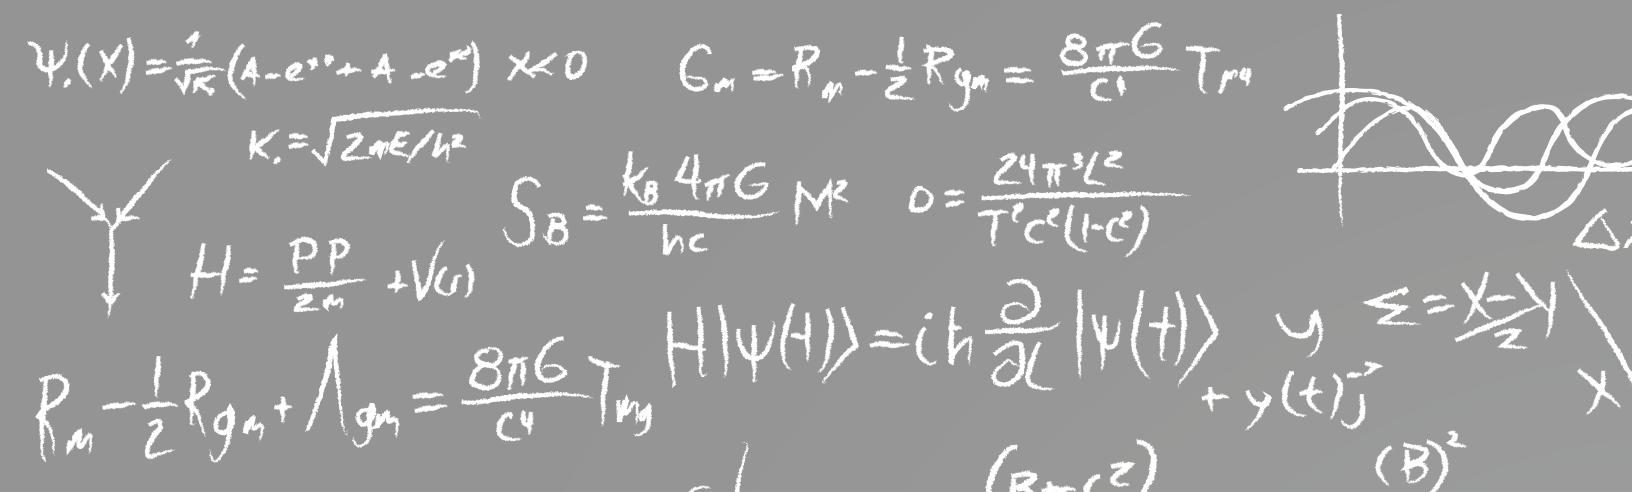

By spatially joining geocoded student addresses to PropertyInfo, Planning Department staff account for housing units that may have more than one students who attend the same school or at the different school levels. The total number of housing units is then aggregated by housing type. The housing types include single-family detached, single-family attached (including townhouses), and multifamily.

Based on the geocoded student addresses from the September 30, 2024, enrollment data, the Planning Department staff calculated the 2024-2025 pupil yield factors, as presented in Table 2.

Table 3. Calculating Pupil Yields/Student Generation Rates, 2024

Housing Types	# Dwelling Units	SCHOOL LEVELS						Total
		Elementary		Middle		High		
		Factors	Yield	Factors	Yield	Factors	Yield	
Single-Family Detached (SFD)	100	0.196	19.6	0.095	9.5	0.132	13.2	42.4
Single-Family Attached (SFA)	100	0.134	13.4	0.064	6.4	0.095	9.5	29.2
Multifamily (MF)	100	0.156	15.6	0.069	6.9	0.090	9.0	31.6

The Formulas

Pupil Yield Factor

A factor is determined based on housing type and school type.

Sum of student addresses by
school type by housing type

Total housing units
by housing type

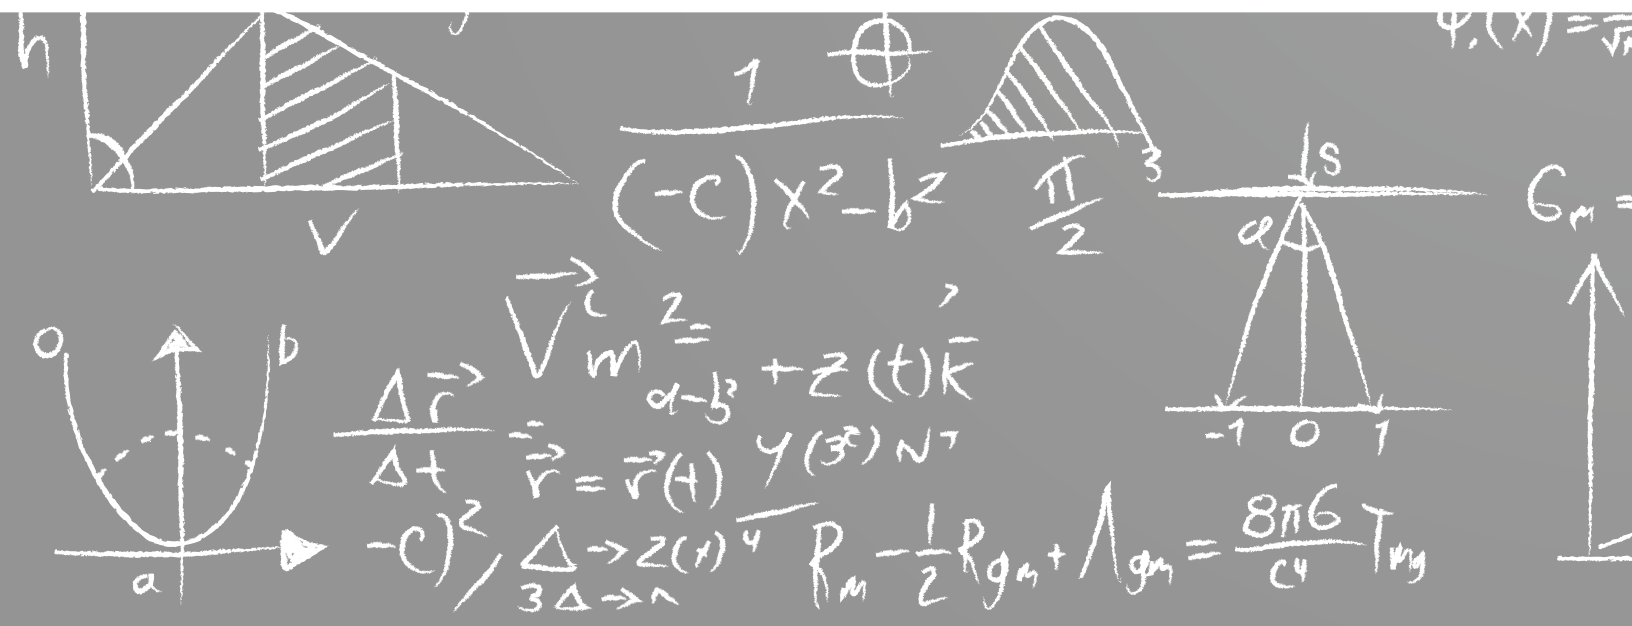

Student Generation Rate

Table 3 illustrates a hypothetical pupil yield calculated for the number of students generated from a proposed 100-dwelling-unit subdivision. The formula is expressed as:

Number of
dwelling units

Pupil Yield Factor by school
type by housing type

Public School Clusters

Legislative Background

On October 23, 2018, the Prince George's County Council adopted CR-015-2018 (DR-3), and amendments were adopted in CR-088-2021. The new Subdivision Regulations, effective April 1, 2022, aim to streamline procedures and encourage appropriate input into the subdivision review process. Under the regulations, the Director of the Prince George's County Planning Department is responsible for evaluating school capacity at the time when a preliminary subdivision plan is proposed.

The Subdivision Regulations set out the requirements for determining to utilize the school clusters to gauge the impact of a proposed preliminary subdivision on its respective public schools. The level of service standard of Section 24-4510(b)(2) states that "The number of students generated by the proposed subdivision at each stage of development will not exceed 105 percent of the state-rated capacity, as adjusted by the School Regulations, of the affected elementary, middle, and high school clusters." The utilization rate for a school year is expressed as the percentage of adjusted full-time enrollment (or full-time equivalent) divided by the state-rated capacity.

Methodology for Cluster Updates

The school clusters are based on the PGCPs feeder system for the current school year. The feeder system is a matrix developed by the PGCPs staff. It is intended to provide students and parents with the flow of schools that a student will attend as they move from one type to the next. This will allow groups of students to stay together as they move from elementary to middle and from middle to high school.

It is important to note that students from the same elementary school may transition to different middle schools. Similarly, students from the same middle school may move on to different high schools. This is common in Prince George's County and other Maryland counties.

To update the public school clusters, the Planning Department staff used PGCPs School Year 2024-2025 feeder patterns, including six high school groupings and their associated feeder middle and elementary schools (Map 1).

Enrollment and Capacity

This section displays the September 30, 2024, enrollment, state-rated capacity, and utilization rate by school in each cluster.

- **Feeder Pattern Tables** showing feeder patterns for elementary, middle, and high schools within each of the six clusters (Tables 4, 8, 12, 16, 20, and 24);
- **Elementary School Enrollment Tables** presenting enrollment, state rated capacity, and utilization rate for elementary schools for each cluster (Tables 5, 9, 13, 17, 21, and 25);
- **Middle School Enrollment Tables** revealing enrollment, state rated capacity, and utilization rate for middle schools for each cluster (Tables 6, 10, 14, 18, 22, and 26); and
- **High School Enrollment Tables** reflecting enrollment, state rated capacity, and utilization rate for high schools for each cluster (Tables 7, 11, 15, 19, 23, and 27).

Not all County public schools are included in these tables. Schools that focus on gifted and talented instruction, language immersion, art, as well as regional schools without neighborhood attendance boundaries, are neither included in the calculation of cluster area utilization nor the PGCPs feeder system. These schools generally draw their enrollment from a wide geographic area.

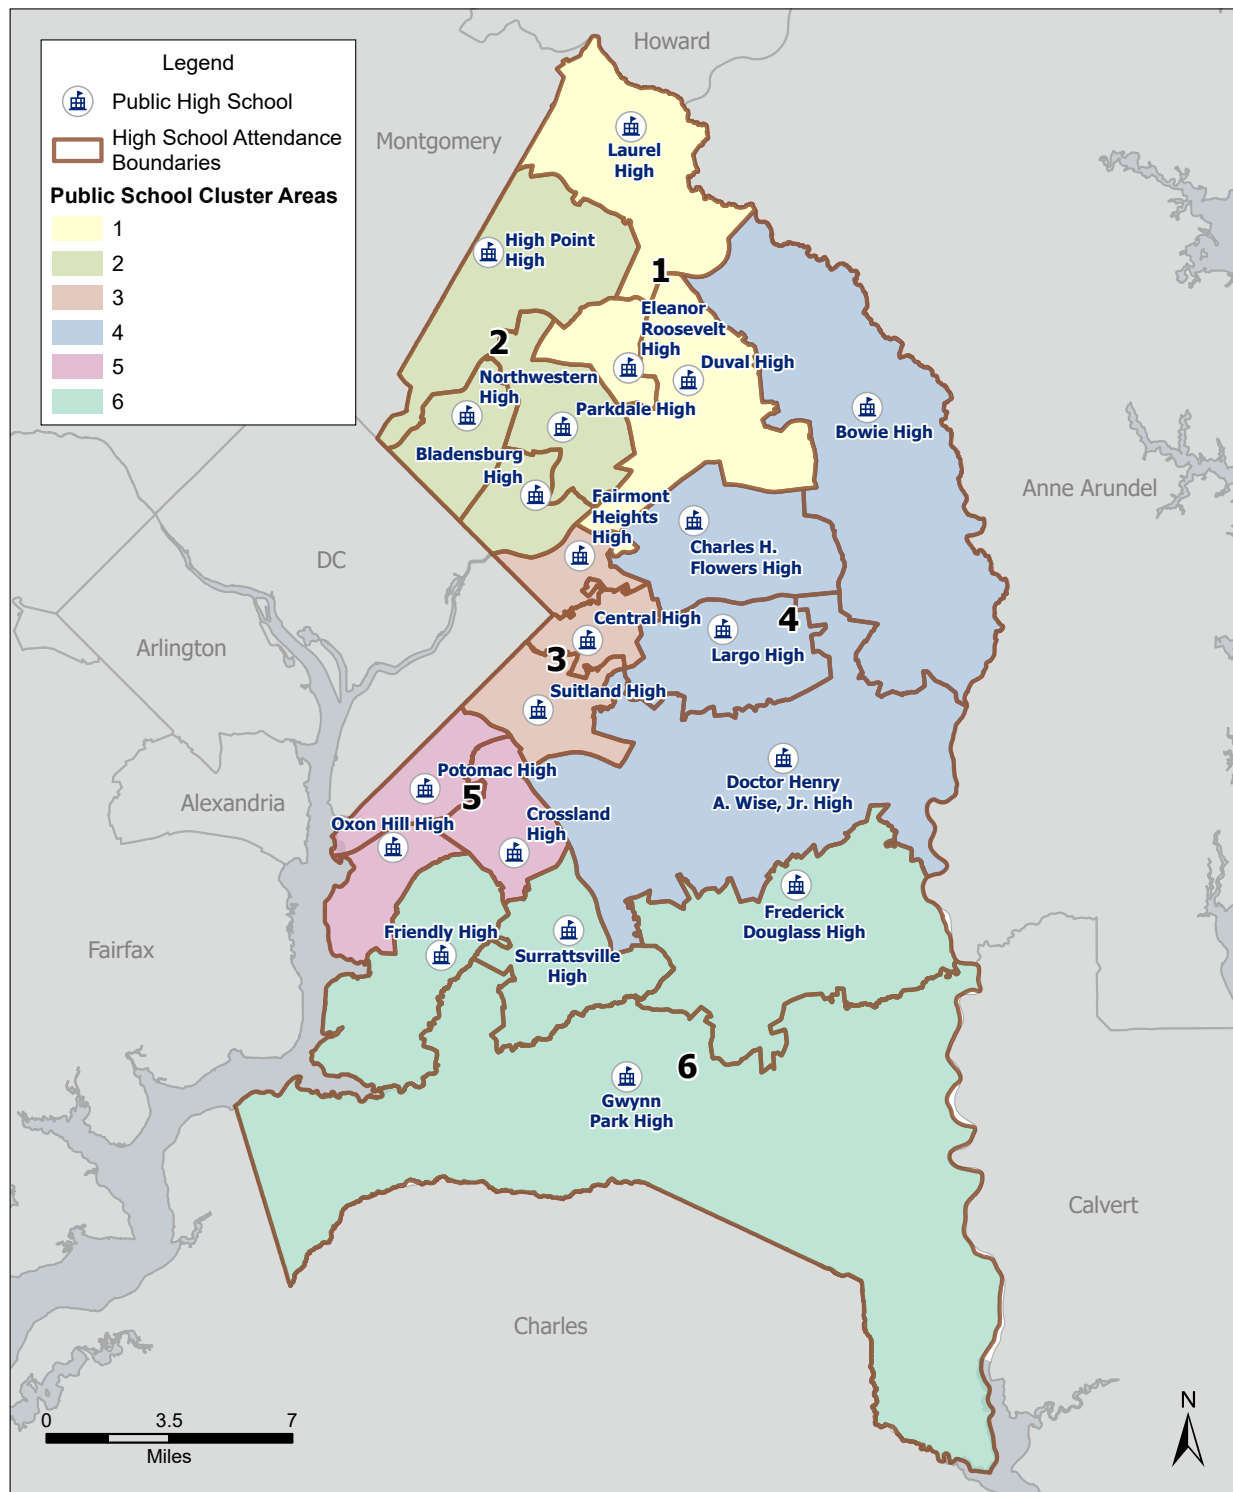

In addition, there still is no state-rated capacity for Adelphi, Templeton, or Woodmore Elementary Schools for the 2024-2025 school year. The 2023-2024 Pupil Yield Factors and Public School Clusters Report provides detailed information on those three schools.¹

Furthermore, Concord Elementary School and Rose Valley Elementary School closed after the 2023-24 school year and are no longer instructional facilities. Crossland High School is now the Career and Technical Education (CTE) Hub for the south County and no longer serves as a comprehensive high school. "Students will still have the option to attend Crossland, but must apply to a Career and Technical program."²

School Overcrowding Conditions

Maps 2, 3, and 4 illustrate the school utilization rates of individual school districts by school type. These maps provide valuable insights and highlight policy implications regarding overcrowding conditions within Prince George's County.

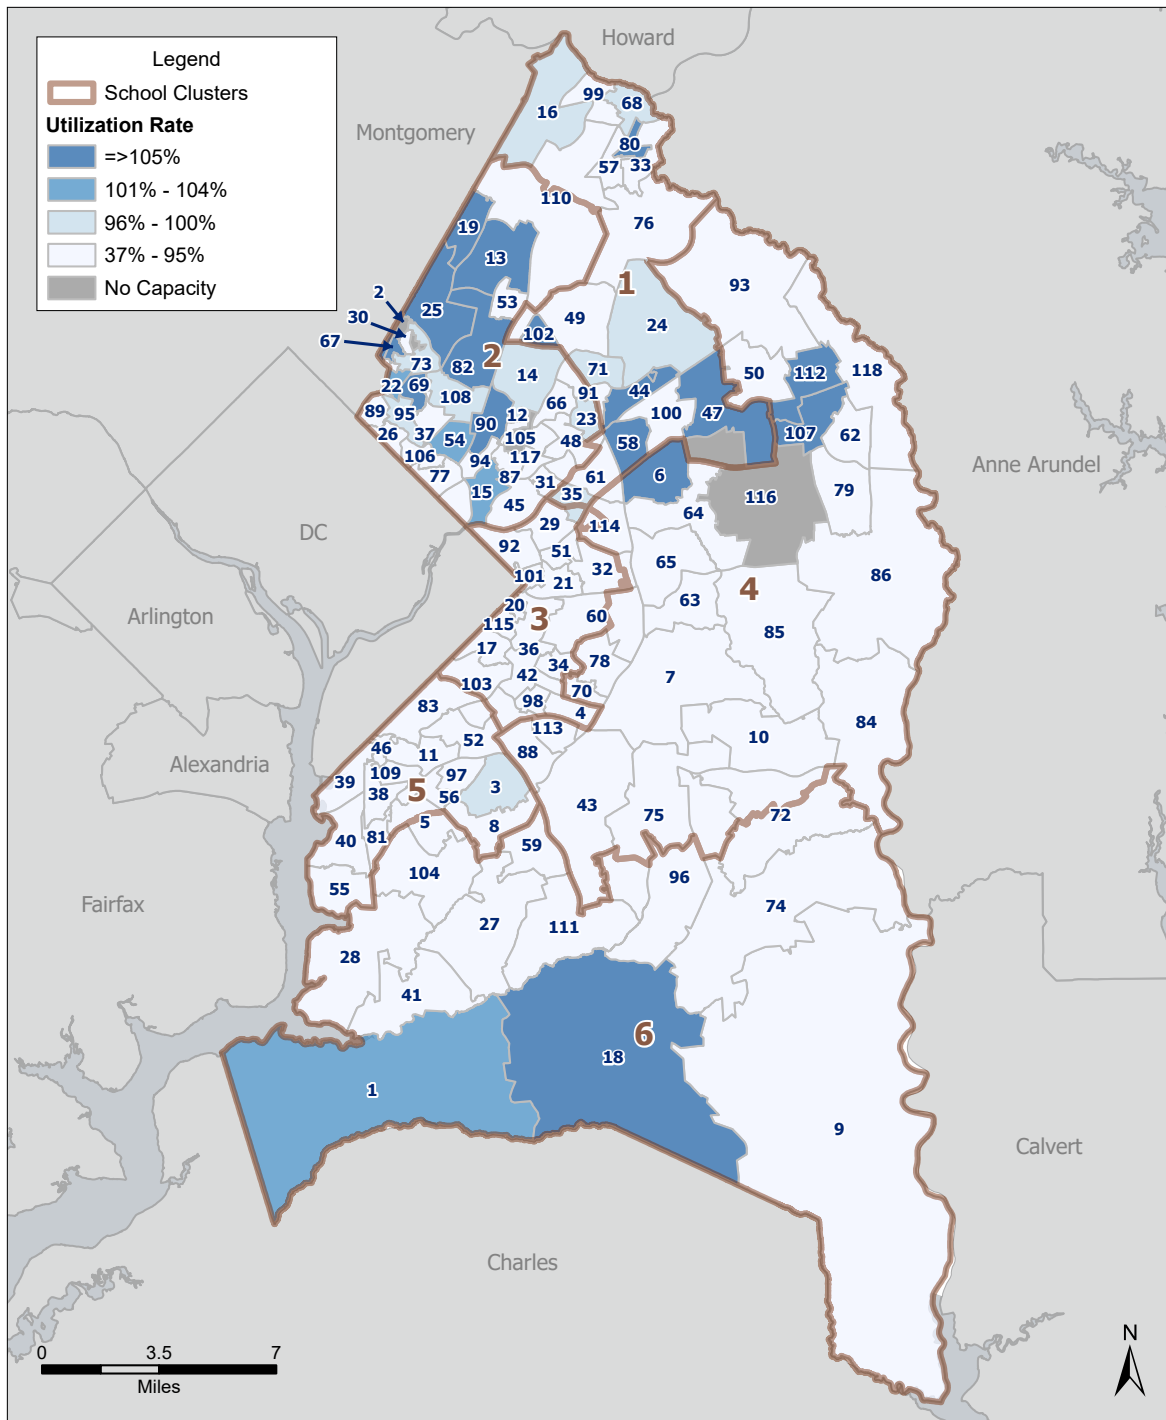

Overall, schools in the northern part of the County, regardless of type, are at or above 105 percent of the state-rated capacity (or utilization rate). The utilization rate is also high for elementary and middle schools in the southern part of the County. The Planning Department and PGCPs work together to

alleviate overcrowding conditions through capital improvement programs, such as building new schools or providing additional seats.

An academy includes pre-K or K through the 8th grade. Therefore, an academy may appear on both elementary and middle school maps displaying a school's utilization rate. Detailed data for the elementary school map are included in Appendix B due to the size of the school district and the number of elementary schools in the County.
