MEMORANDUM

TO: Andree Green Checkley, Esq., Planning Director

VIA: David Warner, Esq., Principal Counsel
Kipling Reynolds, AICP, Chief, Community Planning Division KRR

FROM: Scott Rowe, AICP, CNU-A, Supervisor, Long-Range Planning Section, Community Planning Division BSR

SUBJECT: **Administrative Correction 20-06: Correction of the County Zoning Map and the 2016 *Approved Military Installation Overlay Zoning Map Amendment***

The purpose of this memorandum is to request approval to make an administrative correction to the County Zoning Map and the 2016 *Approved Military Installation Overlay Zoning Map Amendment*.

Background

On November 15, 2016, the Prince George's County Council, sitting as the District Council, adopted Council Resolution CR-97-2016, approving the Military Installation Overlay Zoning Map Amendment. This resolution states "Planning Board staff is further authorized to make appropriate textual, graphical, and map revisions to correct identified errors, to reflect updated information and revisions, and to incorporate the zoning map change reflected in this Resolution."

Section 27-548.52(a)(12) of the Zoning Ordinance defines a "noise contour" as "[o]ne of the series of boundaries illustrated in Figure B showing the increases in the intensity of noise as measured in Decibels (DBA Ldn)." Section 27-548.52(a)(6) defines "High Intensity Noise Areas" as "[a]reas impacted by noise levels exceeding 74 dBA Ldn as established by Figure B (Noise Intensity). The High Intensity Noise Area is one of the Noise Contours in Figure B; the only Noise Contour specifically defined in the Zoning Ordinance. The remaining contours are not specifically defined and are collectively shown in Figure B of Part 10C of the Zoning Ordinance (see Attachment 1).

Section 27-548.55(b) of the Zoning Ordinance states that "[i]nteriors of all new residential construction within the Noise Intensity Contours, including additions, must be certified to 45 dBA Ldn or less by an Acoustical Engineer or qualified professional of competent expertise." As the High Intensity Noise Area is one of "the Noise Intensity Contours" to which the provisions of Section 27-548.55 apply, this provision applies to all properties within the High Intensity Noise Area.

Analysis

All properties within the High Intensity Noise Area are also within the Noise Contours and are subject to the provisions of Section 27-548.55(b).

During development of the Military Installation Overlay Zone between 2010 and 2015, the High Intensity Noise Area was mapped as a separate polygon from the remainder of the "Noise Contour" in the Department's Geographic Information System (GIS). As a result, the following errors arose:

1. Attachments 1 and 3 of the 2016 *Approved Military Installation Overlay Zoning Map Amendment* (MIOZMA) contain tables that identify properties as being in the High Intensity Noise Area but not in the "Noise Area" (Noise Contours). They identify properties as being in both areas *only* where the boundary between the two areas bisects a property. (See Attachment 2)

2. The County Zoning Map in the Department's GIS treats the two areas as separate geographies. This creates a problem where if a property is queried in the High Intensity Noise Area, it shows as not being within the Noise Contours.

Conclusion

Staff recommends resolution of these errors as follows:

1. The GIS layer for the Noise Contours should be revised to incorporate, in total, the High Intensity Noise Area.
2. The tables in Appendices 1 and 3 within the 2016 *Approved Military Installation Overlay Zoning Map Amendment* should be revised to correctly identify all properties wholly or partially within the High Intensity Noise Area as being wholly or partially within the Noise Contours (Noise Area) as well.

Upon approval of this Administrative Correction, the Zoning Map will be corrected. In addition, this memorandum will be distributed with hard copies of the 2016 *Approved Military Installation Overlay Zoning Map Amendment* at the Planning Information Services counter and posted to the Planning Department's webpage for the MIOZMA at: http://mncppcapps.org/planning/publications/BookDetail.cfm?item_id=318&Category_id=1. The online version of the MIOZMA will be revised to incorporate these changes.

Attachments
